Two men were found on their knees on the sidewalk above one of the Toronto police station gratings the other morning, one of whom was holding one end of a long, slender tin tube to the mouth of a prisoner below, while his companion was pouring a small bottle of whiskey into the other. The prisoner had already disposed of one bottle, and was at work at the second when a policeman stopped the game.

Some slanderer asserts that paper makers are the greatest magicians of the age, inasmuch as they transform beggars' rags into sheets for editors to lie on.

The saying that" there is more pleasure in giving than receiving," is supposed to refer chiefly to kicks, medicine and advice

PROTECT YOUR BUILDINGS. Which may be done with one-fourth the usual expense, by using our

PATENT SLATE PAINT (Fiftesn Years Established.)

MIXED READY FOR USE. Fire-Proof, Water-Proof, Durable, Economical and Ornamental.

A roof may be covered with a very cheap shingle, and by application of this slate be made to last from 20 to 25 years. Old roofs can be patched and coated, looking much better and lasting longer than new shingles without the

One-third the Cost of Re-Shingling. The expense of slating new shingles is only about the cost of simply laying them. The paint is fire-proof against sparks or flying embers, as may be easily tested by any one.

IT STOPS EVERY LEAK, and for tin or iron has no equal, as it expands by heat, contracts by cold, and NEVER CRACKS nor scales. Roofs covered with Tar Sheathing Felt can be made water-tight at a small expense, and preserved for many years. This Slate Paint is

EXTREMELY CHEAP. Two gallons will cover a hundred square feet of shingle roof, while on tin, iron, felt, matched boards, or any smooth surface, from two quarts to one gallon are required to 100 square feet of surface, and although the paint has a heavy body it is easily applied with a brush.

No Tar is used in this Composition, therefore, it neither cracks in Winter, nor runs

in Summer.

On decayed shingles, it fills up the holes and pores, and gives a new substantial roof that will last for years. Curled or watered shingles it brings to their places, and keeps them there.—

It fills up all holes in felt roofs, stops the leaks—and although a slow dryer, rain does not affect it a few hours after applying. As nearly all paints that are black contains TAR, be sure you obtain our genuine article, which (for shingle roofs) is gle roofs) is

CHOCOLATE COLOR, when first applied, changing in about a month to a uniform slate color, and is, to all intents and purposes SLATE. On

TIN ROOFS our red color is usually preferred, as one coat is

equal to five of any ordinary paint. For BRICK WALLS

our BRIGHT RED is the only reliable Slate Paint ever introduced that will effectually prevent dampness from penetrating and discoloring the These paints are also largely used on out-

houses and fences, or as a priming coat on fine Our only colors are Chocolate, Red, Bright

RED, and ORANGE.
